

Parse and render content

Download CSS

Render the rest

<link rel="stylesheet" />

<link rel="stylesheet" media="print" onload="this.media='all'"/>

⚠ CSS is render blocking

- ✓ CSS goes to the top of the document
- ✓ Inline critical CSS
- ✓ Load the rest async

```
<link rel="stylesheet" href="style.css" media="print" onload="this.media='all'" />
```

```
<link rel="stylesheet" />
```

(Re-)calculate styles
